Identify This Coin: What is different about it?

Answer at the meeting and in the next Die Break.

Last month's "Identify this coin" was :

A 1972 Double-Die Obverse Lincoln cent

There's Good Toning and There's Bad Toning

Actually, toning is environmental damage. Whether the toning is good or bad depends on to what the coin was exposed. Here are some examples:

Good Toning (In My Opinion):

1908 Indian Head Cent (Raw)

1904 Barber Dime (Raw)

1882-S Morgan Dollar (PCGS MS 66)

1887/6 Morgan Dollar (PCGS MS 64)

Bad Toning (In My Opinion):

1860 Proof 3 Cent Silver (PCGS PR 64)

1945-S (Micro S) Mercury Dime (PCGS MS 66)

1885-O Morgan Dollar (PCGS MS 63)

Sometimes toning changes the demeanor of a coin:

She's Having a Good Day
Half Dime (PCGS PR 62)

Watch Out!
Dime (PCGS PR 63)

Some hobbyists like any and all types of toning, I prefer the "Good" type of toning.
